PROFILE

This is Harish Sekar, a software engineering student who is interested in glowing technologies. I'm very interested in learning new things by gaining their experience. I have done some website projects, and one of the projects got a prize in the web development event at the inter-college level. I am very curious about game development, and I have done a game with Unity 3D that is mentioned here.

WORKS

FARMER'S FRIEND

This is a hackathon project that I did at Vellamal Engineering College. Our project was selected for the final round of two teams, our team and another that won that day. I was a little disappointed, but the whole day was a wonderful experience for me.

[CLICK HERE TO PREVIEW](#)

WEB-CON

This is a project that was made for the "webcon" event conducted at my college. At that event, we were supposed to create a website within 2 hours. We did it and won second place in that event.

CLARK'S ADVENTURE MADE WITH UNITY

Basically, I love to play games on PC and mobile. I wonder about the development process of the game, and I have referred to tonnes of tutorials. Finally, this is my first game, which is called "Clark's Adventure," which is an endless runner game. Here we have obstacles, collectibles, and powerups. The gameplay of this game has been given below;

ACADEMIC PROJECT - COLLEGE PROJECT

This is a project that I'm making for my college because they need a website for verifying the student's details and whether the student paid the fees or not. Basically, this website verifies the bus and hostel fee payment.

TEXT - SPEECH

This is a project that can help us to change the text in speech, like if typing any which is difficult to pronounce at that time this app will be used. It is very useful for people who are trying to speak English like native speakers.

EXPERIENCE

GOOGLE CLOUD FACILITATOR PROGRAM

This is a programme that is conducted by the Google Cloud organization. It has a duration of 30 days because we have completed the milestone set by Google Cloud. It consists of the maintenance and management of cloud storage. It was a very curious and enjoyable learning experience conducted by Google Cloud. The certification is given below.

CERTIFICATIONS

CERTIFICATION IN PYTHON (GUVI)

I was trying to explore Python a little deeper. So I chose the Guvi platform for learning, and it was a wonderful experience learning Python in Guvi.

[CLICK HERE TO PREVIEW](#) 

CERTIFICATION IN HTML

I wondered how the websites are created, and I learned that I need to learn HTML to understand the framing structure of the website. And here also, I chose SoloLearn for a better experience and referred to a lot of tutorials on YouTube to learn web development.

AI FOR INDIA

This was an event I participated in on the Guvi platform about creating a facemask detection, and that was a very nice introduction to artificial intelligence and machine learning. It was also very interesting to me because this event was conducted to break the Guinness World Record for the most learners learning at the same time.
